## STATEMENT OF QUALIFICATIONS

Pool Tech, a WGHK Inc. Company, is a full-service aquatic industry company. We serve clients throughout Iowa and surrounding states, continuing a 45-year tradition of building and servicing pools, spas, fountains and other bodies of water.

Pool Tech uses an integrated, collaborative approach, valuing quality and relationships. Our team approach is our strength—we put our client's vision at the center of our focus. We are highly-awarded, experienced and knowledgeable.

### Capabilities

- Our in-house **AutoCAD Design Service** assures professionalism—we are the **only** pool company in Iowa with in-house design services—providing both commercial and residential design engineering for pools, spas, fountains, complex water features and other bodies of water. We develop designs, create as-built drawings and operation manuals. We partner with other professionals as each project requires.
- Our **Construction Division** has built and managed new construction and renovation for pools, spas, fountains, splash pads and other bodies of water—both indoor and outdoor. We work with owners to establish project parameters within state code and budget, to implement into a design that we plan, manage and construct.
- Our **Commercial Division** utilizes Territory Managers to provide professional pool management, sales and installation of feed equipment, pumps, filtration systems, automation and all types of parts. We work with over 800 bodies of water including municipalities, hospitals, hotels, country clubs, water parks and colleges and universities.
- Our **Service Division** provides service and operational support for commercial and residential pools. We open, close and maintain pools/spas, troubleshoot, make repairs and install equipment. Pool Tech's service team is certified and bonded.
- Our **Pool Store** sells Jacuzzi hot tubs and saunas, Doughboy above ground pools, BioGuard chemicals, parts and supplies to residential customers.
